### DETAILED ACTION

1. This Office Action is responsive to amendment filed 12/8/07. Claims 1, 2, 4-16, 20, 21 are pending in the application.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 2, 4-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 depends from claim 1, claim 1 requires “emits light **only** toward an image display side”, and claim 2 requires “emits light **both** toward an image display side and toward an image information detection side”, thus claim 2 is contradicting to claim 1.

#### *Claim Rejections - 35 USC § 102*

5. Claims 20 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiratsuki et al (US 5,313,055 hereinafter Shiratsuki).

As to claim 20, Shiratsuki discloses an image input/output device comprising: an image information detection section (image read part 105 having light receiving element 107 shown in Figs. 5, 8 for example) for receiving reflected light from an image information object (document

Art Unit: 2629

113 shown in Fig. 8) to detect the image information of the object, and a self-luminous image display section (display part 101 includes light emitting element 103, see col. 6, lines 42-46) for displaying an image based on the image information detected by the image information detection section are attached together in a back-to-back arrangement (Figs. 5, 8, the display part 101 and the image reading part 105 are attached together), wherein the self-luminous image display section functions as an image-information-detecting light source for irradiating an image information object with light through the image information detection section (Fig. 8, and col. 6, lines 42-46), and wherein a light shield film (light shield film 104 shown in Fig. 5, 8) is provided between the image information detection section (image reading part 105) and the self-luminous image display section (display part 101).

As to claim 21, Figs. 5 and 8 of Shiratsuki teaches the light shield film (104) has an aperture defined therein (the opening between two adjacent films 104).

#### ***Allowable Subject Matter***

6. Claims 1, 2, 4-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

#### ***Response to Arguments***

7. Applicant's arguments with respect to claims 20 and 21 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2629

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
